STANEK + WICHLIŃSKI

Lidia Stanek-Wichlińska is an artist and glass designer, a graduate of the Academy of Fine Arts in Wrocław. She works in partnership with Marcin Wichliński, combining the power of craftsmanship with artistic intuition. They see glass as a medium combining tradition and experimentation. In their work, they focus on the relationship between glass, light, and color, exploring the tensions between transparency and color, fragility and durability. In their objects, light becomes a material that determines the final shape of the work, connecting the architectural interior with the external world of nature. They create at the intersection of art and design. Their works are part of private collections in Poland, the Netherlands, the USA, and Japan, among others. Collaboration and dialogue are essential elements of their creative practice.

secret
